

## We need you!

Come along to our sessions which will be held in an informal relaxed environment, with refreshments/coffee/lunch provided.

We have around 4 sessions a year, these will be organised to try and fit in with you and your other commitments.

As well as meeting people with similar interests, you can meet and make your views known to our research teams.

**Remember, we will cover your travel costs and we'll also pay you for your time.**

## Interested?

For an initial discussion, please get in touch using the details below.

**Email:** [bristol-ppi@bristol.ac.uk](mailto:bristol-ppi@bristol.ac.uk)

**Phone:** 0117 34 23151

**Post:** Biomedical Research Unit (PPI)  
Research Floor Level Seven  
Queens Building  
Bristol Royal Infirmary  
Upper Maudlin Street  
Bristol BS2 8HW

**Twitter:** @BristolBRC

**You can register your interest at**  
[www.cteu.bris.ac.uk/ppi](http://www.cteu.bris.ac.uk/ppi)

A full induction will be provided to welcome you to our friendly team and introduce you to our existing public and patient representatives.

This research is funded by the NIHR Cardiovascular Biomedical Research Unit (Bristol). The views expressed are those of the author(s) and not necessarily those of the NHS, the NIHR or the Department of Health.

# Who are we?

Simply put, the National Institute for Health Research (NIHR) is the branch of the NHS that covers the research that we do.

As part of the NIHR, the Cardiovascular Biomedical Research Centre (CV-BRC) at the University of Bristol we bring together experts from many areas of cardiovascular science and disease.

We conduct research that we believe makes a real difference to people. Not only do we want to improve ways of looking after patients with heart disease, we also want to let people know about the important breakthroughs we are making.

Research staff with the winners of the logo competition

Entries to the logo competition held with Severn Beach Primary School. The winning logo features on the front page of this leaflet

# What do we want you to do?

If you are aged between 8 and 16, we need you to help guide the way that heart research is done.

You don't need any medical experience or specialist knowledge.

We want to work WITH YOU to find how your experiences and ideas can help steer our research.

Of course, we will pay for any travel costs you might have when working with us.....

and it'll look great on your CV!
